

I will put this as plain as possible!!Satellite radio is the new thing and is the wave of the future, you cannot stop progress you can only delay it. So why bother??

I was involved in FM radio for six years, and the reason why I am no longer involved is because of satellite transmissions!!

They now automatically run FM radio stations to the point where very little staff is needed, my job became obsolete.

But this is progress, and I welcome it!!

Do not stop progress, this country will be alot better off without your people trying to stop it, heck your people problebly prevented us from having the technology that might have stopped the attacks on our country. So please reject petition 04-106.

Thank you.
